Cabinet Meeting So Decided.

Wassersotox, June 27. Congressmen who are in the city are at a loss for an opinion of the effect the stoppage of the mints in India, which was announced yesterday, will have on congress. The news has literally knocked them opinion-less and almost speechloss. General Wheeter, who is a free silver man, said be believed that the Sherman law would be repealed, providing that something was submitted in its place. The chief thing to secure, he thought was a bal-ance of trade in favor of this country. and then we would be able to map our ingers at England and the rest of the world, no matter what currency they might select. There is no doubt exreased about the alundonment of the conetary conference. Nothing could be iand, and this step shows that no aid need be expected from her.

Whatever the members of congress Whatever the members of congress think or are unable to think about the effect of England's action in India, the administration has but little doubt upon the subject. A gentleman whose position under the government is of a meet intimate and important character defined the administration views in this fashion: "It means that the silver purchase clause of the Sherman law will be repealed unconditionally."

And thereby demonstrate silver?"

can use a double standard in the face of the world's opposition. Should we at-tempt to do so we will soon be in the same position that India has been. Every bit of our gold will be gone."

Two hours were consumed by the cabinet today in discussing the new phase of the silver question and it was practically decided that congress alone is able to deal with measures for relief.

Will Force England to Act. PROVEDS NEED, R. L. June 27. President Andrews of Prown university, and who was one of the American delegates to the Brussels conference, in an inter-view in regard to the action of the In-

thew in regard to the action of the Indian government stopping the free coinage of silver, said:

"It is impossible that this scheme
should bring any relief to the silver situsilver in England. It will make the condition of foreign oxchange a little more
stable as between the traders of England and the big merchants exchanges
of Houseay and Calcutta. That is to
say it will arrest the fall in the intrinsic value of com silver in India and give a stability between the present money in India, which is silver, and the gold money of England. But in doing so it will cause a break between the value of Indian siver as money, and the value as bullion, just such as exists between the silver money of the United States and France and the corresponding bullion, As for America. I believe this action will be forthease. Silver will drop gold prices, and it may be necessary pepeal the an woman law. It will then thes ... force I to take goncerted action with a there is alsone."

No . Tork Cankers Talk.

New York dune 31. Henry W. Can-ett, poside to of the Chase National bank and air-one of the delegates to the most arrest conference at richasels, said remyching the Indian silver consution. The importance of the action of the government of India in stopping the coining of silver cannot be overestimated at the time. It was the only country, with the exception of Mexico, in the word the mosts of which were open to the coinage of silver without limitation. There are at the present un: the only countries in the world which are con-tinuing to produce allow legal tender numery are the United States and Mexico and it must be clear, even to a casual observer, that it is impossible for the United States to safely common the coimage of oliver or the issuance of money against builton ourchase. It is columnted that there is in circulation about \$1,000,000,000 in India. It forms the entire circulation medium of the country. India absorbs in coinage more silver than any other country in the world, about \$40,000,000 annually. This fact will give some idea of the tremendous effect the closing of the ludis scients to silver coinage will have upon the price of the white metal. It is a surroung to the United States that we gunnet go safely into the absorption of the depositation metal in this country without seriously substraining our

Simila, June 27.—In explaining to the India council the bill providing for the stoppage of free coinage of silver and other monetary measures, the marquis of Lansdowne, viceroy of India, said he hoped the government would not be criticised for disposing of the important question at a single sitting. The keynote of the scheme was rather to prevent a further fall in exchange than to raise the value of the rupee. The fixing of the provisional rate of exchange at Is id provided an automatic means of preventing the closing of the mints and the violent disturbing of exchange rates.

New York, June 27.—Bar silver sold today at 73 cents per ounce nominal. The London quotation has fallen to 35 cents per ounce on small dealings. Bankers and brokers are of the belief that the full effect of the closing of the ludian mints has been felt in the silver market. But 70 was bid for silver certificates today and 78 asked, without a single sale up to noon. On account of the drop in silver Ontario mining shares broke 4½ to 12½. The director of the mint at Washington says the government will soon be able to purchase silver below 70 cents an ounce. New York, June 27. Bar silver sold

DENVER, June 27. In an interview on DENVER, June 27.—In an interview on the financial situation, Senator Wolcott said: "If an extra session of congress should be called today, the Sherman law would not be repealed. The times are dark enough to indicate that a streak of light must break in from some direction soon. It means immediate disaster to western interests, but it may be a blessing in disguise if we can hold on. Much as we suffer, the disaster entailed to Great Britain is worse and a continued falling in price of silver must force an international agreement."

DENVER, June 27.—The unprecedented low price of silver yesterday, due, it is thought, to the action of the government of India in suspending free coinage, created a sensation here. David H. Moffatt, the largest mine owner in Colorade, gave out last night that with silver at Ri cents and miners wares \$1 a day, there were but few mines that could be operated except at a loss. He has summoned all his managers to Denver and will propose to the miners that they accept \$2 per day until the price of silver goes up, or he will be obliged to shut down. silver at all cents and m

FAVORA'S FAST MILK. Jewett's Stallion Trots in the Re-markable Time of 2:12 1-2.

Reservities, Ind., June 27.—The Rushville races opened today with a sensational mile by Favora, a 6 year-old stallion, by Patchen Wilks, dam by John Gilpin, owned by C. H. Jewett of Jewetteville, New York. The stallion took the first two heats of the 2:19 trot in 2:21½ and 2:22½ respectively. Starter Walker then announced that the distance rule would be waived and the horse seat for a record. The rest of the bunch had hardly reached the last quarter when Favora came under the wire in 2:12½, the fastest mile trotted this year and the fastest ever made by a stallion thus early in the season. Jewett has a covered track and points to this as a vindication of his theory that horses should be trained during the winter.

CRICAGO, June 27.—A crowd of 7,000 people were present at Washington park today, attracted by the Lakeside stakes. The betting upon this dash for the 2 year old fillies was hot and heavy. Clara Bauer was the favorite of the horsemen who came up the line. Their efforts to burn up the ring were stayed somewhat by the Green B. Morris contingent's play upon Ellen, the pretty chestnut daughter of Fonse. Starter Pettengill again had his hands full with the hig field, and after thirty five minutes of breaking and bad acting at the post, he dropped his flag to a straggling start. Stavenson took Clara Bauer to the front bandily and had things his own way to the stretch, when up came the Morris good thing whipping and winning by a length and a balf. Taral made a desperate finish upon Dolly Varien, but he anchored in fourth place. Corrigan's crowd bet tots of money on Horon in the opening event, and they had doses of goose flesh over Hoggett's littledged finish. But Corrigan's brown out had a clear bead in the Iront. Burglars entered H. D. Plumb's store, at Plumb's Mill. a few miles north of this city at 4 o'clock pesterday morning and secured a large amount of plumber. The safe was "cracked" in professional style, and the following articles were taken from it: One silver watch, \$40 in postage stamps. \$250 in cash; a check for \$50 drawn by the New York Hiscuit company in the Fourth National bank, a postofice money order on 'the Grand Rapids postofice, sent from Peteskey, payable to Dawn Clark and endorsed by H. D. Plumb, and a number of insurance policies and passion payers.

The method of entering the safe was to drill a hole near the combination plate, and then with a book made for the purpose to pult the look from its fastenings. The drill used was larger than those usually used by professionals. The method of procedure indicates that the men who burglarized the postofice at Holland and tried to crack a safe there are the same parties who visited Mr. Piumb.

At Holland the robbers secured \$385 in pennies, and Monday several trampish looking men at North Park paid for all they bought with pennies. At 10 o'clock Monday Huntley Russell telephoned policy headquarters about the matter, and Detectives Gast and Jake way were sent out. The rough characters had left before they arrived, and it is presumed they are the fellows who committed the robbery.
